Complete the *postOrder* function in your editor below, which has **1** parameter: a pointer to the root of a binary tree. It must print the values in the tree's postorder traversal as a single line of space-separated values.

Input Format

Our hidden tester code passes the root node of a binary tree to your *postOrder* function.
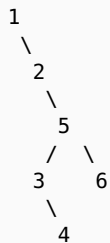

Constraints

$1 \leq$ Nodes in the tree ≤ 500

Output Format

Print the tree's postorder traversal as a single line of space-separated values.

Sample Input

```
1
 \
  2
   \
    5
   /  \
  3    6
   \
    4
```

Sample Output

```
4 3 6 5 2 1
```
