Given an array of integers, find the sum of its elements.

For example, if the array $ar = [1, 2, 3]$, $1 + 2 + 3 = 6$, so return $6$.

**Function Description**

Complete the *simpleArraySum* function in the editor below. It must return the sum of the array elements as an integer.

simpleArraySum has the following parameter(s):

- *ar*: an array of integers

**Input Format**

The first line contains an integer, $n$, denoting the size of the array.
The second line contains $n$ space-separated integers representing the array's elements.

**Constraints**

$$0 < n, ar[i] \leq 1000$$

**Output Format**

Print the sum of the array's elements as a single integer.

**Sample Input**

```
6
1 2 3 4 10 11
```

**Sample Output**

```
31
```

**Explanation**

We print the sum of the array's elements: $1 + 2 + 3 + 4 + 10 + 11 = 31$.
